

Need More Books?

The Libronix Digital Library System lets you build a library tailored to your specific study needs! In addition to the books you have already purchased, there are thousands more books that can be integrated into the Libronix DLS. You may purchase these books a number of different ways:

Option 1. Use our state-of-the-art unlocking process within the Libronix DLS to unlock books from the discs you already have. Simply start Libronix and click Tools | Unlock Resources. The purchase transaction can be completed by Internet or telephone...no file download necessary!

Option 2. Head over to www.logos.com and find books you can download individually or buy as boxed collections.

Option 3. Buy from your local Christian bookstore. Any package that carries the Logos Library System or Libronix DLS logo will integrate seamlessly into your digital library!

Installation Guide

Logos Bible Software Series X Installation Guide

To watch a video tutorial of the installation process, visit:

www.logos.com

1. Install the Software

- A. **Close all programs.**
- B. **Place your Logos Bible Software CD or DVD in the drive. If you have a set of discs, use the white disc labeled "Use First." The installation will start automatically.**
- C. **Follow the on-screen instructions to install the software. Make sure to restart your computer if you are prompted to do so.**

The installation does not start? Go to Start | Run and type D:\Setup in the Open box, where "D" is the letter of your CD or DVD drive. Click OK.

You want to install to a different drive? Select Custom Installation when that option is offered.

2. Activate

After you install the Libronix DLS software you need to activate it.

- A. **Double-click the red Libronix icon on your desktop to start.**
- B. **Click the Account Management link in the pop-up window that appears. Enter your serial number, which is the alphanumeric code printed on the sticker affixed to the CD or DVD packaging.**
- C. **Once you have submitted your serial number, click "I am a first time user" to enter your user information.**
- D. **Use the appropriate links to activate over the Internet or by mail.**

You need to open Account Management? Find it in the Tools menu.

Are you upgrading to a new Library? You will not receive a serial number on a sticker. Your library will be unlocked through an email from help@libronix.com.

Important! You must activate your software within 45 days or you will lose access to your books.

3. Backup Licenses

Backup your licenses immediately after the installation, using the floppy disk that is provided or some other media of your choice.

- A. **Place the disk in your floppy drive.**
- B. **Go to Tools | Backup Licenses.**
- C. **Make sure that your floppy drive is selected (drive A:), then click Save.**

Keep this floppy in a safe place!

You don't have a floppy drive? Save the backup to My Documents and then burn it to a CD or copy it to another type of media.

Important! The backup disk saves a record of the books you have purchased (unlocked). Use the same backup disk every time you install, reinstall or unlock any books for the Libronix DLS. You can restore these licenses to a second computer or a new installation through Tools | Restore Licenses.

4. Install the Books

Libronix DLS automatically 'discovers' all electronic books on a CD or DVD and offers to copy the ones you own to your local hard drive. Following these steps enables you to use your library without the disc in the drive.

- A. **Leave your Logos Bible Software CD or DVD in the drive or, if you have a set of CDs, place Disc A in the drive.**
- B. **Watch for a notice "Discovering Resources" on the bottom right corner of your screen. Wait for it to disappear before continuing.**
- C. **Click on the Location Manager link in the popup window to see a list of unlocked books to copy from this disc to your hard drive. Click the Copy Resources button to copy the selected books.**
- D. **Repeat Step 4 with any other CDs.**

You need to open the Location Manager? Find it in Tools | System Tools.

There are no books to copy on a CD? Some discs contain locked books only. The back panel of this guide gives information on how to expand your library.
